

Threshold Inspection Requirement Acknowledgment

Town of Fort Myers Beach Building Department

Building Permit Number

THRESHOLD INSPECTIONS ARE REQUIRED ON PERMITTED BUILDING PROJECTS MEETING THE FOLLOWING CRITERIA PER FLORIDA BUILDING CODE. ADDITIONALLY, A FEE-SIMLE OWNER MAY DECLARE A BUILDING AS A THRESHOLD BUILDING

THRESHOLD BUILDING. In accordance with Florida Statute, any building which is greater than 3 stories or 50 feet in height, or which has an assembly occupancy classification that exceeds 5,000 square feet in area and an occupant content of greater that 500 persons.

110.8.1 - The enforcing agency shall require a Special Inspector with the Qualifications as required by Florida Statues 553.79 to perform the structural inspections on a Threshold Building pursuant to a structural inspection plan prepared by the engineer or architect of record. The Threshold or Structural Inspection Plan must be submitted to the enforcing agency prior to the issuance of a building permit for the construction of a threshold building. The purpose of the structural inspection plans is to provide specific inspection procedures and schedules so that the building can be adequately inspected for compliance with the permitted documents. The Special Inspector may not serve as a surrogate in carrying out the responsibilities of the Building Official, The Architect, of the Engineer of Record. The Contractor's contractual or statutory obligations are relieved by any action of the Special Inspector.

A STRUCTURAL INSPECTION PLAN is required as part of the permitted documents prior to issuance of the permit. Approval by the Building Official of the Qualified Threshold Inspector to be responsible for inspections shall also be required prior to issuance of the Permit.

ALL INSPECTION REPORTS shall be submitted bi-weekly to the Building Official, signed by the Qualified Inspector and contain the following statement.

"I have personally inspected" the following applicable structural work items on the above named project and find that they are in compliance with the Florida Building Code 2017, latest 6th edition and the approved Construction Documents.

Seal

License #

I am licensed Florida Engineer with the Qualifications as a "Special Inspector" as set forth in Chapter 61G15.35.003 F.A.C
