

# Impervious Surface Calculation Sheet

This calculations sheet is a necessary attachment for all of the Town of Fort Myers Beach building permit applications that involve a change to a properties impervious surfaces. In order to assure compliance with this limit to impervious surfaces in the LDC, an accurate calculation of the amount of impervious surface coverage is needed. A short definition of impervious surface is “any hard surface that prevents or restricts the flow of water into the soil”. Examples of imperious surfaces include rooftops, sidewalks, parking lots, patios, pools, roads or any driveway made of asphalt, concrete, gravel or paver blocks. Please complete the following information:

Site Address: \_\_\_\_\_ Permit #: \_\_\_\_\_

Lot Dimensions: \_\_\_\_\_ Total Lot Area (Multiply length x width of Lot): \_\_\_\_\_

Use the following Table to Calculate Total Impervious Surface Area, (proposed and existing) attach additional sheet if necessary.

Impervious Surface Item	Proposed	Existing	Dimensions	Area (Ft2)
Single Family/Duplex	<input type="checkbox"/>	<input type="checkbox"/>		
Addition	<input type="checkbox"/>	<input type="checkbox"/>		
Accessory Building	<input type="checkbox"/>	<input type="checkbox"/>		
Driveway (calculations based site improvements, exclude ROW)	<input type="checkbox"/>	<input type="checkbox"/>		
Patio, Deck, Porches (include curbing and any gravel/shell, compacted surfaced areas)	<input type="checkbox"/>	<input type="checkbox"/>		
Sidewalks or Walkways (include pavers)  (Exclude landscape beds)	<input type="checkbox"/>	<input type="checkbox"/>		
Recreational Area (basketball court, tennis court, pools, etc.)	<input type="checkbox"/>	<input type="checkbox"/>		
Other	<input type="checkbox"/>	<input type="checkbox"/>		

Impervious Calculation: \_\_\_\_\_ Total sq.ft. of impervious surface/ \_\_\_\_\_ sq ft. Total Lot Area= \_\_\_\_\_  
(must be less than .67)

I verify that the above information is true and accurate to the best of my knowledge and that I have included all existing or proposed impervious surfaces. I understand that providing incorrect information may result in the need to remove impervious surfaces if it is discovered that the maximum coverage has been exceeded or creates an impact to surrounding properties.
