Subject: RE: Please review DCI17-0001 Sufficiency Letter Response 1

Patty,

Please see below:

1. The response provided still does not adequately explain why Land Use 820 would be acceptable for some portions of the site and Land Use 826 would be acceptable for other portions under the various scenarios. Given the average sizes of developments utilized by ITE to develop trip generation rates, Land Use 826 would be more appropriate for the entire retail portion of the pre-demolition and proposed development scenarios.
2. There is no dispute that a portion of the visitors to the site would arrive by either foot or bicycle. However, an explanation or basis is still not provided as to how these rates were selected, or why they would be different between the various scenarios, especially since no pass-by reductions are allowed for Land Use 826. Again, to provide a consistent, objective comparison between the various speculative scenarios, consistent methodology should be used for all evaluations. A basis for these rates should also be provided and documented in the report – as they are provided currently, they appear arbitrary by nature.
3. Internal capture calculations should be revised based on modifications to trip generation forecasts and bike\pedestrian reductions discussed above.
4. Feasible developments should be considered for all development scenarios – otherwise there is no point in performing the comparison, as the results do not provide an objective basis of comparison.
5. The response is sufficient – adequate information on trip distribution based on existing traffic patterns is provided.
6. The comparison between trip generation forecasts for the various scenarios should be revised in conjunction with revisions to trip generation forecasts and trip reductions, as appropriate.
7. The response provided is accepted.

Thank you

Hello,

I hope you have had a chance to review this project.

I will need your comments by 7/26/2017. Please send either Matt Noble or myself your comments.

Thank you!

Patty Prevost
