POOL AND SPA

POOLS, SPAS, OR WATER FEATURES IN COASTAL HIGH HAZARD AREAS (V ZONES)

Pools, spas, or water features located within the areas of special flood hazard are designated as coastal high-hazard areas or “V” Zones. These areas have special flood hazards associated with wave wash and scour, therefore the following additional provisions apply:

The Design Professional must certify that the pool, spa, or water feature including deck and foundation, either at-grade or elevated, has been designed and site located to assure that:

- It will not be subject to breaking up or floating out of the ground
- It will not increase wave or debris impact forces during the storm surge water forces of a coastal flood
- It will not increase the damage potential or jeopardize the integrity to the foundation and elevated portion of any nearby buildings ([Reference 2014 FBC: 3109.7 Swimming Pools.](#))

Pools, spas and water features in a “V” zone **SEAWARD** of the Coastal Construction Control Line **MUST** be pile supported and the statements above must be included by the Design Professional.

Pools, spas and water features in a “V” zone **LANDWARD** of the Coastal Construction Control Line **DO NOT** need to be pile supported but the statements above must be included by the Design Professional.

(Please print contractor's Name)

Hereby affirm that one of the following methods will be used to meet the requirements of Chapter 515, Florida Statutes.

_____ The pool will be isolated from access to the home by an enclosure that meets the pool barrier requirements of Florida Statute, Section 515.29.

_____ The pool will be equipped with an approved safety pool cover that complies with ASTM F1346-91 (Standard Performance Specifications for Safety Covers for Swimming Pools, Spas, and Hot Tubs).

_____ All doors providing direct access from the home to the pool will be equipped with a self-closing, self-latching device with a release mechanism placed no lower than 54" above the floor or deck.

*****IN ADDITION *****

If a fixed barrier is to be used in place of the screen around the perimeter of the pool, no property perimeter fence will be required. If a removable child barrier is used, one end shall not be removable without the aid of tools. (Manufacturer's specifications and barrier location sketch must be submitted.)
